PROFILE

Video editor and motion designer from Yerevan, six years in professional post-production. I cut for the biggest bloggers and influencers in Armenia, channels whose videos reach hundreds of thousands of people, which means editing built around retention: the first two seconds have to hold and the pacing has to carry the viewer to the end. Alongside the edit I generate video locally in ComfyUI and run the full AI pipeline myself, from prompt to final grade, so AI shots actually cut together with real footage.

EXPERIENCE

Saint-Hov / Lead Video Editor	Since 2020
Armenia's biggest gaming and vlog creator. I run the whole content pipeline across YouTube, Instagram and TikTok: editing, motion graphics, thumbnails and publishing, plus branded commercials produced for the channel.	
Hayk Freestyle / Lead Video Editor	Since 2023
The country's leading football freestyle and sports blogger. Long-form YouTube episodes and vertical short formats cut for maximum retention.	
High Garage / Video Editor	Since 2024
Armenia's largest automotive channel. Vlogs, car reviews and races, from three-minute product spots to forty-minute travel episodes.	
Ruben Yesayan / Video Editor	Since 2024
One of the first video bloggers in Armenia. Documentary-style shorts combining location footage, archive material, animated inserts and subtitles.	
National Election Campaign / Video Editor & Motion Designer	2026
Broadcast television spots for a nationwide political campaign: hand-drawn 2D explainer animation, archive research, colour grading, plus motion content for street LED screens and the campaign brand opener.	
Mr.Architect / AI Video Artist	Since 2025
AI-reconstructed architecture shorts. Entire pipeline handled locally in ComfyUI: prompting, generation, cleanup, edit and sound design.	
Freelance / Video Editor & Motion Designer	Since 2019
Commercials, brand animation, music and event content, podcast cuts and social verticals for clients including SummerFest, Spin The World and Rearrange, alongside international clients.
